OBJECTIVE

Junior Software Engineer with strong skills in **Backend development, AI, and LLM technologies**. Passionate about building intelligent systems and robust, scalable backend architectures.

EDUCATION

Bachelor's degree in Computer Science — Beirut Arab University (BAU)

September 2023 - May 2025

- **1st place** winner in senior projects competition

EXPERIENCE

Full Stack Web Development Intern — The Digital Hub UNRWA

January 2026 – May 2026

- Engineered full-stack features across the entire development lifecycle using Next.js, React, and NestJS.
- Architected and delivered scalable **RESTful APIs** with **NestJS, Express.js, and FastAPI**, serving real-time application needs.
- Enhanced AI retrieval pipelines by integrating **RAG systems with vector databases and hybrid search strategies**.
- Strengthened application security through robust **authentication** flows and tuned **relational/NoSQL databases** for optimal performance.
- Applied **SOLID principles** and **Design patterns** (Repository, Factory, Strategy) to ensure maintainable, extensible, and testable codebases.
- Worked within an **Agile (Scrum)** methodology, participating in sprint planning, daily standups, and retrospectives; tracked tasks and managed backlogs using Jira.

AI Engineer Intern — IDS Fintech

September 2025 – November 2025

- **Researched Retrieval-Augmented Generation (RAG)** techniques and applied them to build effective financial AI solutions, alongside prompt engineering for optimized model outputs.
- **Developed and optimized LLM-based** features tailored for fintech workflows.
- Built backend services using **FastAPI** and implemented **MCP servers** to support real-time, modular, and extendable AI task orchestration.
- Deployed services using **Docker** containers and managed cloud deployments for production environments

PROJECTS

Stoxify | AI-Powered Stock Prediction & Trading Platform | www.stoxify.trade

- **Developed a web app** that predicts stock market trends using **news sentiment analysis & historical data** with a team of four.
- **Built an AI model** to enhance trading decision accuracy & minimize financial risks.
- Developed a **Laravel backend** for real-time stock analysis.
- Optimized **PostgreSQL** for high-frequency data.

SKILLS

Languages & Frameworks: Python (Advanced), FastAPI (Advanced), JavaScript/TypeScript (Intermediate), NestJS (Intermediate), Laravel (Intermediate), Express.js, React, Next.js, Django

Backend & Scalability: Redis (caching & session management), PostgreSQL, NoSQL databases, microservices architecture, load balancing, CI/CD pipelines, Docker, Celery/RQ

AI & LLM Engineering: RAG, LangChain, LangGraph, TensorFlow, vector databases (Pinecone, pgvector, Qdrant), LLM fine-tuning (LoRA), Model Context Protocol (MCP), AI agents, LLMOps (LangChain Tools), production model deployment (Docker + GCP)

Languages: Arabic (Native), English (Fluent).
