OBJECTIVE

Junior Software Engineer with strong skills in **backend development, AI, and LLM technologies**. Passionate about building intelligent systems and robust, scalable backend architectures.

EDUCATION

Beirut Arab University

September 2023 - May 2025

Bachelor's degree in Computer Science

EXPERIENCE

IDS Fintech — AI Engineer

September 2025 – November 2025

- **Researched Retrieval-Augmented Generation (RAG)** techniques and applied them to build effective financial AI solutions, alongside prompt engineering for optimized model outputs.
- **Developed and optimized LLM-based** features tailored for fintech workflows.
- Built backend services using **FastAPI** and implemented **MCP servers** to support real-time, modular, and extendable AI task orchestration.
- Deployed services using Docker containers and managed cloud deployments for production environments

PROJECTS

Stoxify | AI-Powered Stock Prediction & Trading Platform | www.stoxify.trade (ongoing)

- **Developed a web app** that predicts stock market trends using **news sentiment analysis & historical data** with a team of four.
- **Built an AI model** to enhance trading decision accuracy & minimize financial risks.
- Developed **Laravel backend** for real-time stock analysis.
- Optimized **PostgreSQL** for high-frequency data.

Word2Vec NLP Analysis | [Github](https://github.com)

March 2025

- Developed a **Word2Vec model** on **194K+ Amazon reviews** (Cell Phone Accessories dataset), achieving **92% semantic accuracy** in capturing word relationships.
- Applied **advanced NLP techniques** using **Python, Gensim, TensorFlow**, and data preprocessing with **pandas & NumPy** to generate **high-quality embeddings**.
- Explored and visualized word embeddings to **reveal meaningful patterns** and relationships, improving how text data can be understood and used in **real-world NLP tasks**.

CERTIFICATIONS

Beirut Arab University's achievements

- **1st place** winner in senior projects competition

May 2025

SKILLS

Technical Skills: Python (Advanced), Laravel (Advanced), FastApi (Advanced), Java (Advanced).

Languages: Arabic (Native), English (Fluent).
